INSPIRE Maintenance and Implementation Group (MIG)

Overview

This is the collaboration space for the INSPIRE Maintenance and Implementation Group (MIG) Work Programme ([MIWP 2016-2020](#)).

The following actions are currently active:

- [Action 2016.5: Priority list of datasets for e-Reporting](#)
- [Action 2017.2 on alternative encodings for INSPIRE data](#)
- [Action 2017.4 on validation and conformity testing](#)
- [Action 2018.1: Streamlining the monitoring and reporting for 2019](#)
- [Action 2019.2: Improving accessibility of data sets through network services](#)

Meeting minutes of the MIG and MIG-T meetings are available here:

- [MIG meetings](#)
- [MIG-T meetings](#)

2016.5 Priority data sets

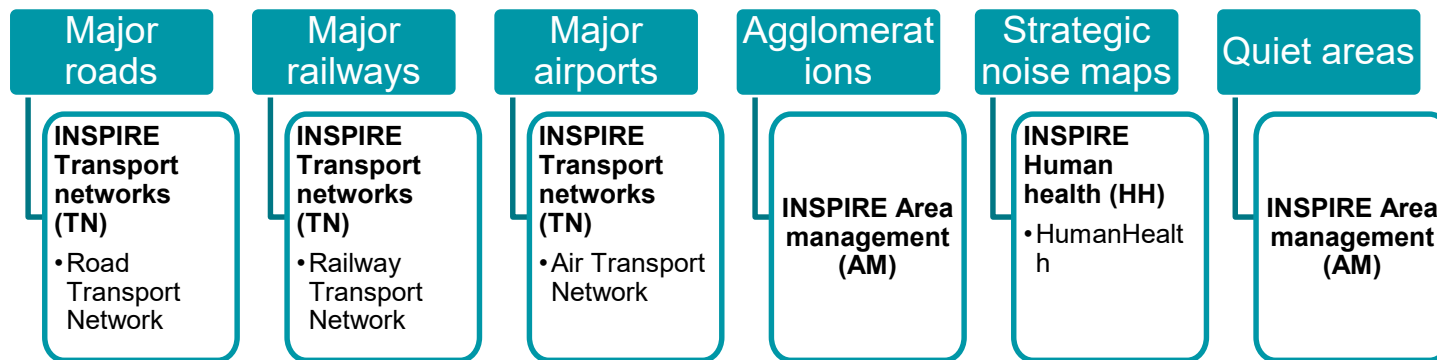

Task 1: Manage and update the priority list

Task 2: Make data available as is

Task 3: Common and interoperable European data models (IED, MSFD and noise)

Task 4: Monitoring the [availability](#) of pan-European datasets

Mapping between priority datasets and INSPIRE data themes is in progress.

2017.2 Alternative encoding

1. Develop concrete proposals for **alternative encodings**
2. Define a **template and procedure** for proposing and endorsing **additional encoding rules**

Alternative encoding: GeoJSON - pilot this alternative encoding and focus on two themes: Addresses (AD) and environmental monitoring facilities and observations (EF&OM).

Discussions, examples and the Good Practice documents will be held on [Github](#).

There is an increased interest in a **GeoPackage encoding** from a number of sides (governments, software vendors, companies, etc.).

MIG-T to discuss and decide how to address the GeoPackage encoding at the MIG-T meeting in Prague (Heidi og Lars deltager).

2017.4 Validation and conformity testing

The work under this action resulted in the following ATS and ETS for the following TGs:

- Metadata (v1.3) (ATS, ETS)
- Download services (Atom, WFS) (ATS , ETS)
- View services (ATS)
- Discovery Services (ATS)
- Data specifications (common requirements and theme-specific requirements for Annex I themes) (ATS, ETS)
- Spatial data services (ATS)

ETF Validator i Kortforsyningen

In order to provide a complete test framework, the following components would still need to be added to the INSPIRE validator:

- Metadata v2.0 (ATS and ETS)
- Annex II data specifications (ATS, ETS)
- Annex III data specifications (ATS, ETS)
- View Services, WMS (ETS)
- View Services, WMTS (ETS)
- Download Services, SOS (ATS, ETS)
- Download Services, WCS (ATS, ETS)
- Discovery Services (ETS)

Test-installation hos JRC - bliver frigivet efter test/rettelser

Thematic Cluster er blevet til Community Forum

<https://inspire.ec.europa.eu/forum/>

- the two newly set up cross-cutting discussion groups (SW & tools and INSPIRE & ENV. policy) are to be populated with the content and good and relevant links to other sources of information.

Welcome to the INSPIRE Community Forum

This collaborative platform is built upon 11 discussion groups. The three sections below group together content from these groups related to: Software & Tools, Thematic Domains and INSPIRE & Environmental Policy. For more specific queries you can use the "Search by Tag" tool.

Software & Tools

Facing technical issues? Doubts on which software to use?

Thematic Domains

Questions about INSPIRE Data Specifications?
Using INSPIRE Data in your domain?

INSPIRE & Environmental Policy

Interested in the INSPIRE Working Plan 2016-2020? Looking for synergies with INSPIRE?

Selected Highlights.

Discussion conclusions, interesting posts and other content provided by our Forum facilitators.

Search by Tag

Search and retrieve content using our curated tag list.

I skal tagge jeres interesser

Log ind og vælg Tag Index.

Herefter tagge de emner som I vil følge og få notifikationer for.
